

Additives selection Guide

In advance our recommendation for all additive tasks:

Use **Fuel Guard 2** to finish off any special treatment to provide long-term lubrication and anti-corrosion protection and to improve engine performance

Petrol and Diesel engines

Problem:

Injector is dirty and the spray pattern of fuel is effected negatively (engine rattles and/or irregular rotational speed while standing, performance loss, engine response loss)

or

GPF and DPF systems

Problem:

GPF or DPF is clogged and exhaust does not get through properly (relevant icon flashes signaling a problem, performance loss)

or

Turbo charger

Problem:

Deposits and general contamination in the turbine housing (drop in performance, less acceleration and generally declining "turbo-kick")

or

Highly effective premium quality additives

Selected additive products especially developed for usage with petrol, diesel, hybrid and turbo engines as well as DPF/GPF systems

ORDER NOW!

If you have any questions or if you would like to place an order, contact your **KENT Area Sales Manager** by telephone: **0800 / 136 925**, or email: kentsales.uk@kenturope.com

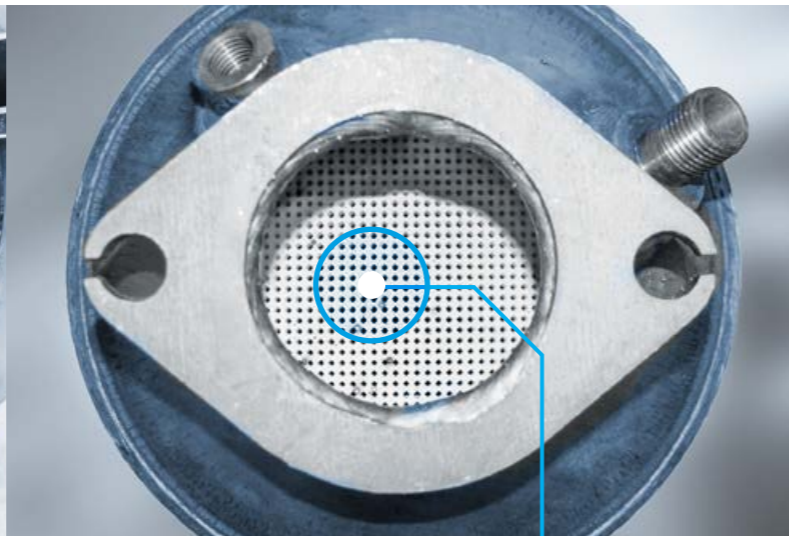

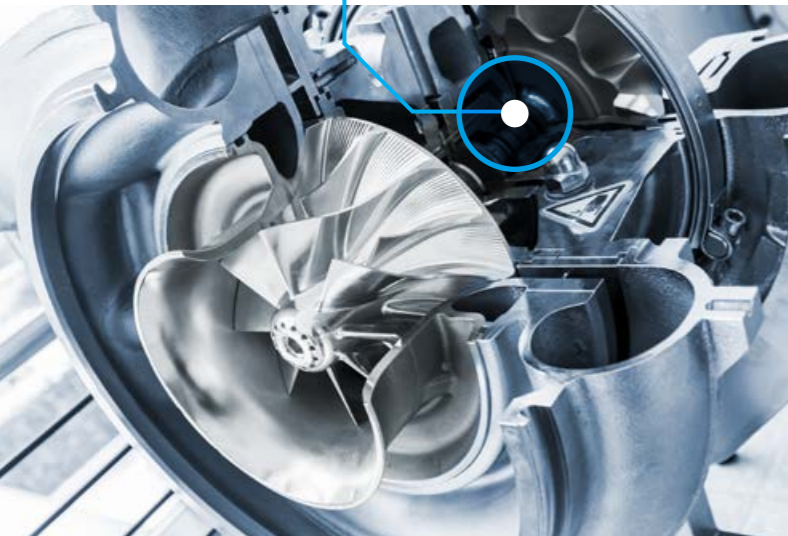

Part. No. 86681 – 250 ml bottle

TURBO / GPF CLEANER

Special additive for cleaning the turbo and GPF – suitable for all kinds of petrol and petrol/hybrid engines

BENEFITS

- Helps to reduce soot built up in EGR valves
- Removes deposits in the turbine housing
- Helps to free sticking vanes and maintains free movement of variable geometry turbos
- Maintains acceptable particulate levels in the petrol particulate filters

Part. No. 86669 – 250 ml bottle

DPF CLEANER ULTRA

Special additive for cleaning the DPF suitable for all kinds of diesel and diesel-hybrid engines

BENEFITS

- Can be used as a preventative treatment or as a cure at the first sign of a problem with the Diesel Particulate Filter regeneration cycle (signal or other)
- Reduces emissions – helps to avoid a further breakdown in the future
- Combats ash deposits on intake valves – for a clean and powerful combustion

Part No. 83970 – 250 ml bottle, 83975 – 5 l can, 83977 – 200 l drum

FUEL GUARD 2

Unique and effective cleaner for the care and maintenance of the fuel system and other engine components on petrol, diesel and hybrid engines

BENEFITS

- Providing long-term lubrication and anti-corrosion protection
- Effectively removing carbon and ash deposits dispersing them through the system during combustion
- Provides lubricity, anti-corrosion, anti-oxidant and anti-wear features

Up to 9 times more concentrated compared to competition!

Petrol One Shot 2: Part. No. 84594 – 250 ml bottle

Diesel One Shot 2: Part. No. 84595 – 250 ml bottle

PETROL ONE SHOT 2 & DIESEL ONE SHOT 2

Effective rapid cleaners for petrol, diesel and hybrid engines to complement the long term fuel treatment

BENEFITS

- Petrol One Shot 2:** Up to 4 times more concentrated compared to competition
- Diesel One Shot 2:** Up to 8 times more concentrated compared to competition
